Education

University of Groningen — *Groningen, Netherlands*
PhD Student — *Sep 2026 - Present*

Tongji University — *Shanghai, China*
Master of Computer Science and Technology — *Sep 2023 - Apr 2026*

- GPA & Rank: **4.84** / 5.00, **5** / 116

Tongji University — *Shanghai, China*
Bachelor of Computer Science and Technology — *Sep 2018 – Jun 2023*

- GPA & Rank: **4.91** / 5.00, **3** / 121

Publications

SkillSafetyBench: Evaluating Agent Safety under Skill-Facing Attack Surfaces
Chang Jin*, An Wang*, Zeming Wei*, Kai Wang, Biaojie Zeng, Qiaosheng Zhang, Chao Yang, Jingjing Qu, Xia Hu, Xingcheng Xu
Accepted at *EMNLP 2026 Main*, [Aug, 2026].

When Silence Is Golden: Can LLMs Learn to Abstain in Temporal QA and Beyond?
Xinyu Zhou*, **Chang Jin*** (co-first author), Carsten Eickhoff, Zhijiang Guo, Seyed Ali Bahrainian
Accepted at *ICLR 2026*, [Jan, 2026].

Effective and Explainable Molecular Property Prediction by a Chain-of-Thought Enabled LLM and Multi modal Molecular Information Fusion
Chang Jin, Siyuan Guo, Shuigeng Zhou, Jihong Guan
Published in *Journal of Chemical Information and Modeling* (JCR Q1), [May, 2025].

Research Experience

Research on Safety Benchmarking for AI Agent Skills — *Jan 2026 – Aug 2026*
Advisor: Dr. Xingcheng Xu, Dr. Qiaosheng Zhang (Shanghai Artificial Intelligence Laboratory)

- Developed `SkillSafetyBench`, a benchmark for systematically evaluating safety risks and adversarial vulnerabilities in AI agent skills, with a focus on realistic workflows and artifact-grounded verification.
- **Publication**: Co-first author (ranked 1st) of a paper accepted at *EMNLP 2026 Main*.

Research on Abstention-aware Temporal QA with Large Language Models — *Sep 2024 – Dec 2025*
Advisor: Dr. Ali Bahrainian, Prof. Carsten Eickhoff (Joint Lab, the University of Tübingen & Brown University)

- Present the first systematic study of abstention-aware temporal QA with LLMs, analyzing a variety of training methods as well as input information types through extensive experiments.
- Showed that SFT induces overconfidence and harms reliability, while RL improves reasoning accuracy but exhibits similar risks.
- **Publication**: Co-first author of a paper accepted at *ICLR 2026*.

Research on AI for Drug Discovery *Sep 2023 – Dec 2025*

Advisor: Prof. Jihong Guan (Tongji University), Prof. Shuigeng Zhou (Fudan University)

- Conducted research on AI for drug molecule discovery, including large-scale multi-modal molecular dataset construction and LLM-based methods for molecular property prediction.
- **Publication**: First-author paper in *Journal of Chemical Information and Modeling*

Honors and Awards

Graduate Scholarship of Tongji University, Master's Program	2025
Outstanding Graduate of Tongji University	2023
First-Class Scholarship of Tongji University (top 5%), Bachelor's Program	2019, 2021
Second Prize of China Undergraduate Mathematical Contest in Modeling, Shanghai	2020

Skills

Programming Languages: Python, C++, C

Research Skills and Topics: Large Language Models (LLMs), AI safety, agent safety evaluation, benchmark design

English: IELTS 7.5 (Listening: 7.5, Reading: 8.5, Writing: 7.5, Speaking: 6.5)
